

NOTICE OF DISCONTINUATION

For product: Conext XW+ 6848

November 2, 2020

Dear Customer,

This letter serves as formal notice that Schneider Electric's Solar Business will be replacing the XW+ product line with the XW Pro. The XW Pro builds on the successful track record of the XW+ with new features, new grid codes, and new capabilities for integration and communication with lithium batteries. The XW Pro features have been released in phases; now that the product line has matured, it is necessary to withdraw the legacy XW+ product from the market following the sale of existing inventory. Please contact your Schneider Electric representative if you have any questions about the XW Pro and this transition. We are excited to continue our business with you in this next chapter, and look forward to discussing any questions about the Schneider Electric product line.

XW+ Products to be Discontinued	XW Pro Replacement
XW+ 6848 120/240V – 865-6848-01	XW Pro 6848 NA – 865-6848-21

Schneider Electric will continue to support the existing warranty in accordance with our service and warranty policies.

Yours Sincerely,

Sandra Herrera

Product Marketing Manager
Schneider Electric Solar Business
