

### V2.05.00 Build 0002 (January 2021)

#### Changes/New Features

- Added support for new SW FGA Numbers:  
865-4024-21, 865-4024-55, 865-4048-21, 865-4048-55
- Added support for HV MPPT 100 FGA 865-1034

### V2.04.00 Build 0001 (April 2018)

#### Changes/New Features

- Added Bulk Termination Voltage setting to “*Custom*” and “*Lithium Ion*” battery type.

### V2.03.00 Build 0007 (November 2017)

#### Changes/New Features

- Display the correct unit (Amps) for the “*DisChglmax*” parameter shown in the “*Lithium Ion*” screen accessed from the “*Charger Settings*” screen when battery type is “*LithiumIon*”.
- Set the XW and CSW in “*Standby Mode*” when navigating to the “*Adv Features*” screen and restore the previous mode when exiting the “*Adv Features*” screen. This is because the settings listed in this screen can only be changed while in “*Standby Mode*”.  
Request the user to confirm entering the “*Standby Mode*” before navigating to the “*Adv Features*” screen.
- Show the '*Heartbeat BMS*' advanced feature for MPPT devices only when battery type is “*Custom*”.
- Removed the '*Lithium Ion*' option for the "*Batt Type*" parameter in the "*Charger Settings*" screen for MPPT devices.
- Corrected the display of the faults and warnings listed in their respective logs.

### V2.02.00 Build 0003 (November 2016)

#### Changes/New Features

- Enabled the SCP to display the CSW power and current flowing out to the grid. This affects the System Home, CSW Home, and CSW Meters screens. The values displayed by the SCP for the CSW power and current will be positive or negative depending on whether the power flows from the grid or into the grid.
- The SCP system home screen now always displays the CSW battery voltage and current.
- AGS generator mode can now be configured as “ForceOnAutoOff”. This mode turns on the generator and then transitions into “Automatic” mode. Requires AGS v3.01 BN0001 or later.
- SCP now correctly displays Battery Monitor Warning 230 as "Please synchronize when battery is fully charged".

- Event logs from XW and CSW are now suppressed from popping up on SCP.

### **V2.01.00 Build 0008 (November 2014)**

#### **Changes/New Features**

- Added AGS SoC trigger Enable/Disable configuration.
- New features for CSW: AC Support on SoC and Li-ion battery discharge settings.
- Added Li-ion battery configuration for both CSW and XW. Moved Li-ion battery discharge.
- Fixed CSW load power display issue on system screen.
- When more than one Battery Monitor is on the network, just use bank1 voltage and SoC.
- Fixed Freq display space issue in CSW meter screen.

### **V2.00.00 Build 0013 (July 2014)**

#### **Changes/New Features**

- Updated SCP for new features in the XW+ program and Battery Monitor.

### **V1.06.00 Build 0019 (December 2012)**

#### **Changes/New Features**

- Updated for CSW Inverter/Chargers.
