The Conext™ Advisor 2 web portal SaaS includes a complete suite of tools for professional users enabling:

- Advanced security to protect your assets
- Situation awareness of your power plant operations
- A fully adjustable and scalable platform to meet your specific power plants design and size
- Connected 24/7 to bring intelligence in the control room

solar.schneider-electric.com
Global leader in digital transformation of energy management and automation

Schneider Electric Solar Business

As an industry leader, Schneider Electric Solar Business focuses on designing and developing products and solutions for the solar power conversion chain and providing best-in-class global customer service and technical support. Our technology is powering photovoltaic systems all over the globe.

As the solar market goes through a rapid wave of consolidations, Schneider Electric Solar Business is one of the very few companies that can assure that spare parts, service and technical support will be continually available over the 20+ year life of a solar installation. A solid partner, financially and technically. We are your long-term partner for solar.

Schneider Electric Solar Business - Offer Services

We are committed to maintaining the value of your solar investment. Protect your solar investment and maintain your system’s profitability with a service contract from Schneider Electric Solar Business.

Wherever your system is installed, there is a Schneider Electric Solar Business support team trained in your system’s technology, and your local power requirements and regulations. We maintain parts depots in every major region. Schneider Electric Solar Business Service currently supports over 4,500 commercial clients and over 300,000 solar power installations around the world.

15+ years of experience in Solar

#1 solar Inverter Supplier in the O&M space

110 countries

150 workforce fully dedicated to Solar in the main countries. 200+ Specialized software engineers in 3 continents.

10+ GW

connected to the grid with Schneider Electric utility-scale inverters since 2000

2.8+ GW monitored

100 % countries dedicated to Solar Business
Conext™ Advisor 2 - Solar Monitoring

Hypervise your Power Plant

Conext™ Advisor 2 is a web portal with an efficient, task-oriented interface for managing and optimizing the performance of solar power plants, and includes a complete suite of tools for professional users.

It is the right balance between on-site infrastructure, that makes the site autonomous in managing the energy with Grid support function, and a powerful web portal leveraging the cloud advantages and advanced technologies.

It is accessible from anywhere in the world using a secure internet connection to the web portal.

Conext™ Advisor 2 is a hypervisor that may be used with third-party major equipment brands but delivers additional benefits when used with Schneider PV EcoSystem. The user-friendly and intuitive interface will enable you to keep an eye on your plant efficiency.

**Supported browsers**
- Google Chrome above version 44
- Mozilla Firefox above version 40
- Internet Explorer above version 11
- Opera for Mac OS above version 11
- Safari for Mac OS above OS version 8

**MAIN FEATURES**

- Real-time operation and control of a PV plant.
- Performance analysis through advanced solar KPI.
- Underperforming PV plants and equipments identification.
- Production forecast.
- Utility grid management.
- Reporting and data extraction.
- Custom dashboards.
- Intuitive and user friendly interface.

*Fully deployed soon

**Cloud Architecture**

**Benefits**
- **Latest innovative and secured technology** at your fingertips.
- **Ensuring cybersecurity** of the whole system.
- **Ensuring an Availability** of Cloud application.
- **Reduce on-premise Hardware Expenses** throughout the entire project life.
- **Ensuring consistency, integrity and availability** over 20 years of data through management of data storage strategy.
Cybersecurity is a top priority

Risk Management

Cybersecurity is a top priority and is one of our top priorities at Schneider Electric Solar Business. As the demand for distributed cloud computing & Internet of Things (IoT) is rapidly growing, our customers face increasing threats against critical infrastructures. Your information could be a target of these attacks, leading to the following critical consequences:

- Plant production stop and control (stop inverters, change configuration, etc)
- Financial loss due to non-production
- Data diffusion or loss (user personal data): contact information such as emails, name, company ...

Moving to the Cloud, is the most secured way to protect your data and plant sites

We want to bring through our digital services, managing these risks, and add more value to our customers. The main benefits of using the cloud technology:

- Latest innovative technology at your fingertips
- Unlimited data accessibility: wherever, at anytime
- Hardware material & maintenance cost savings
- Storage data in different places
- Secured data & whole system as maximum

At Schneider Electric Solar Business, digitalization is at the heart of all our activities and is something that our team takes seriously. Several processes have been implemented to assure our customers that their investments are well-protected: developing partnerships with reputable companies, selecting the best tool, following experienced requirements, implementing most secured models of threat analysis.

Reliable partners

At Schneider Electric Solar Business, we collaborate with partners, leaders who develop and manage secured software to minimize threats to our customers and protect their data and services at maximum. We take advantage of their expertise to enhance our job and allow our customers to manage their business serenely.

Conext™ Advisor 2 with Azure Cloud infrastructure is resilient to attack, safeguards user access to the Azure environment, and helps keep customer data secure through encrypted communications as well as threat management and mitigation practices, including regular penetration testing.

Protect your valuable investment from cyber threats.
Work with a trusted partner. Work with Schneider Electric Solar Business.

Our team and partners work hard to minimize consequences of the cyber-attacks. So decide wisely what is important for you, protect your data and secure your plant.

Why partner with Schneider Electric?

Why trust Conext™ Advisor 2?

- Digital Technology
- Cybersecurity of whole System.
- Reliable
- Long Term Partner to Sustain Assets

Spare Parts management
Our worldwide footprint is designed to optimize logistics flow and supply chain efficiency

Power Plant Services
Long-term contracts to secure and sustain your assets throughout their lifecycle or on-demand to match specific needs

Remote Control and Monitoring
We bring intelligence in day-to-day operations through our hypervision platform

Schneider University
Benefit from tailor-made courses in one of our training centers
